

Evolution Remote Display

See the value of money

The optimisation of cash management calls for specialist experience, resources and truly innovative technology. Across the world, Talaris' cash management solutions are trusted by thousands of organisations to ensure their cash is managed securely and efficiently whilst delivering the ultimate in productivity.

Talaris have in excess of 250 patents granted across 26 countries and are world experts in optimal cash handling solutions. 2,300 Talaris professionals, including over 1,000 service and support staff and 130 business partners cover over 100 countries delivering these solutions - wherever money moves.

Introducing Talaris's uniquely designed, 8 digit remote display for connecting with the Evolution and Nvision Series products. This simple, effective and remarkably affordable display is incredibly easy to use and will enhance the functionality of the Talaris desktop product range.

Ease of use

A bright, 8 digit LED screen optimises the viewing by a consumer, making it ideal for a store, bank branch or casino application. The 14.2 mm / 0.56" digit height ensures the display can be captured by a CCTV system.

Universally flexible

The compact size and mounting bracket (included in the box) allows the display to be positioned in multiple configurations ensuring that all customer requirements can be met.

Powered by a universal power supply and with a selection of electrical plug accessories, the display is ready for use "out of the box" no matter where in the world you are.

Driven by RS232 connection, the display updates every 0.5 seconds when connected to the EV86-Series and at the end of every count when connected to Nvision.

Contemporary Design

The unique styling and colour of the display is unique to Talaris and maintains the look and feel across the latest range of Talaris desktop banknote processing equipment. The contemporary and premium look will compliment the image of all cash handling organisations and the highly durable polymer housing makes the display ideal for high volume cash environments.
