SOLUTIONS

QuickChange[®]

Self-service coin deposit center

“QuickChange is easy to use and easy to maintain. It's another service that we can provide to our clients to enhance the value of banking here.”

Financial Institution President and CEO

flexible efficient

The QuickChange self-service deposit center was strategically designed with your institution in mind. The result is a truly unique self-service coin deposit center that will positively impact every part of your operation.

New WAVE™ Sensor Technology

The QuickChange series is equipped with our advanced WAVE Coin Authentication Technology that ensures non-stop processing of coins, reduces fraud, and virtually eliminates cleaning and maintenance requirements for your staff.

WAVE technology delivers high speed, accurate coin authentication through five unique tests on each coin including diameter, edge thickness, surface alloy, core alloy, and magnetic properties. This advanced technology efficiently rejects unwanted foreign coins, tokens, and slugs without degradation of the counting process thereby reducing the chance of fraudulent use.

WAVE technology is also designed to eliminate coin jams caused by mutilated coins or other foreign objects. WAVE is the only technology on the market engineered to be nearly self-cleaning and highly impervious to debris resulting in reduced cleaning and maintenance requirements for your staff.

The QuickChange™ Universal Placement Kit

Now you can place your QuickChange almost anywhere in the branch for maximum exposure and accessibility with the optional QuickChange Universal Placement Kit. Place it in an alcove, through the wall, or just about anywhere! The Universal Placement Kit is designed expressly for the coin bagging version of QuickChange. When bag changes are needed simply unlock the base and pull the unit forward.

When bag changes are done, roll QuickChange back into place. Use the optional QuickChange Coin Transfer Cart to transport full bags to the vault.

Expand your potential client base

Bilingual instructions on a large easy-to-read display make QuickChange accessible to a larger demographic. The simple “A” and “B” button navigation increases ease of use. The ADA compliant design ensures easy accessibility to clients with physical disabilities, while the child-friendly features provide a fun and educational opportunity for even your youngest customers.

Marketing and brand-building opportunities

Talaris understands that having equipment in your lobby is not enough. That’s why each QuickChange comes with a marketing success kit. Included is a sample marketing plan complete with creative applications, such as transaction stuffers, posters and advertisements.

Protect your investment and your customers

The QuickChange coin conveyor safety lock prevents accidental contact with moving parts and keeps customers safe from harm. The inclined coin conveyor design protects the internal mechanisms of the unit from large debris and liquids.

Reduce staff intervention

QuickChange’s coin collection options and unique alert systems ensure that continuous processing is maximized and out-of-service risk is minimized. With little intervention needed, your staff can stay focused on serving clients.

HOW IT WORKS QuickChange is user-friendly and intuitive for your clients to use in just three easy steps.

Step 1 Press language choice

Step 2 Pour coins into tray

Step 3 Take receipt to teller to deposit or exchange for cash

COIN CAPTURE OPTIONS

Bin capture

The QuickChange bin sets a new standard for design excellence and functionality. QuickChange accommodates two coin bins for increased capacity. The coin bins are designed to meet the needs of your financial institution and your armored carrier. Each bin is strong, durable and can be easily moved with minimal effort.

Bag capture

To ensure that up-time will be maximized, the QuickChange bag version holds twelve “Fed Ready” bags. Double and triple bags are used for the most frequently received coin denominations. The optional QuickChange transfer cart can assist with transporting full bags to a secure location.
